Claims 1 and 5-20 are presented for examination.

The remarks filed on have been received and entered.

Claims 1 and 5-20 are again rejected under 35 U.S.C. 103 as being unpatentable over the European Patent Application 0 224 352 for the reasons set forth on pages 2 and 3 of the office action of April 7, 2004.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the jet or stream of droplet in comparison to the spray of droplets taught by the prior art. The allegation is not well taken. Applicant fails to differentiate how a jet stream of droplet is different than spray of droplet. Applicant on page 14 of the specification refers to GB patents, which teach the devices for administering the claimed invention of jet stream of droplets. The prior art teaches a spray of droplets and also devices for administering jet stream of droplets for ophthalmic use. There is no evidence to establish the advantages of the claimed droplets over the droplets used by the prior art. Thus, the prior rejection sustains.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
